

Our institute is serving the students in particular and the society in general since 1965. Our institution is recognized under 2 (f) & 12 (B) of UGC Act 1956. The institution has under gone three cycles of NAAC accreditation with B++, A, A grade respectively.

We are the pioneers in providing quality education since its inception from 1965. We have several provisions extended for the benefit of students and teachers. But our institution would like to be recognized as 'distinct' in the following attributes:

#### **Maintenance of Spoorthi Wallpaper Boards:**

The maintenance of Spoorthi Wallpaper Boards is one of the best practices of the institution which helps us in exploring the hidden talent of the students in the form of limericks, art drawing, poems, photography and short articles, photos, pictures and writings etc. Three big boards have been installed on the right side entrance wall of the Library which attracts the attention of the students. It is an inspiring act leading to develop multifaceted personality.

#### **Installation of Datti Nidhis and Adoption of poor students:**

Our college has created "Datti Nidhis and adoption of poor students" for which faculty members and stakeholders are generously contributing money

- To help academically excellent and needy students of our college. None should drop out of an educational course because of financial difficulties.
- To provide a social dimension to the educational system of the college and inculcate societal responsibility and commitment among the faculty members of the college
- To ensure gender equality and make students access to higher education.

#### **My College My Tree**

The students adopt one plant and take care of it throughout their duration of study. Then it is donated to the college. This practice helps in increasing the green cover of our college. This is one of the practice that has made our college covered with so much of greenery in this semi-arid zone. Also students are benefitted by the knowledge of growing the plants, its rearing practice, etc.

#### **Life science museum:**

Learning and teaching of Botany and Zoology is complete only when the students are able to see actual preserved specimens. It becomes easier by observing organisms closely in the specimen bottles rather than merely reading about them. The departments of Botany and Zoology have preserved plants and animal according to taxonomic classification and are

kept in museums. Charts and models are also being displayed in the laboratories. Plants are grown in the Botanical Garden and specially maintained in the shade house.

### **Sports facilities:**

Good Infrastructure is the backbone for any Sporting activity. We have a **clay tennis court** in our college. To make student take on this sports our gymkhana department conducts and allows other organizations like Lions club to organize tennis tournaments in our college. There is also a cricket practice court at one corner of our play ground to make our students develop their cricket talent. The KHO KHO ground, clay Kabbadi Court, football ground, well established Gym. And many other facilities are provided to the students. Thus our college has ample facilities to guide and train the students in both indoor and outdoor games. India has got most of its promising top athletes from the rural background, thus our infrastructure will motivate the students to shine in at national and international level in the years to come. It is now helping the all-round development of the rural youths.
