The project of ratio analysis in the service industry is not merely a work of the project. But a brief knowledge and experience that how to analyse the financial performance of the firm. The study undertaken has brought in to the light of the following conclusions. According to this project I came to know that from the analysis of financial statements it is clear that Sheetal Industries the company have been incurring profit during the period of study. So, the firm should focus on getting of huge profits in the coming year by taking care interna as well as external factors. Gross profit and net profit of the Sheetal Industries is fluctuating over the past five years. On an average the Sheet industries overall performance is quite satisfactory.
